Rhi Hamilton – Lived Experience Training Hub

- The group started out with a discussion prompted by the PowerPoint image of a tree showing signs of new growth. This image is also shared in the Intro to Peer Work course which is used to explore some of the messages and the value of Lived Experience work. The group contributed and noticed some important messages – growth, the passing of time, hope, ‘nurse log’ (offering support and healing to others), regeneration. This discussion led into our ‘why’ and the LEx Hub.
- The LEx Hub was established to provide entry level training to people with a Lived and or Living Experience of mental ill-health, suicide, and alcohol and other drugs, as well as and carers who have been a part of those journeys.
- The LEx Hub uses the values and guiding principles of the Lived Experience workforce from the National Mental Health Commission to explore peer work in practice, these values and guiding principles have been key in being able to establish courses that are supportive of a range of experiences.
- The LEx Hub offers two peer specific courses: The one-day Introduction to Peer Work and the two-day Foundations of Peer Work course. These courses are suitable for current or aspiring peer workers. It was noted that the Introduction to Peer Work course has also been supporting individuals to recognise whether they are interested in or ready to explore peer work further.
- The LEx Hub also offers a course for people interested in leading a Lived Experience workforce.

- The LEx Hub also offers Cultural Collaborative Workshops for organisations interested in exploring their current practices and or readiness to embed a Lived Experience workforce.
